Jamera (Mera) Bradley

Senior Product Designer · Healthcare, Insurtech & AI-Assisted Workflows
New York, NY · (256) 278-6026 · jamera.bradley@gmail.com · meraabradley.com · linkedin.com/in/jamerabradley

SUMMARY

Senior product designer with 5+ years designing regulated, high-stakes products where trust is the product: insurance enrollment, caregiver health tools and agentic AI platforms. Led the redesign and first design system for VIU by HUB, contributing to 25% revenue growth after launch. Trained in cell and molecular biology, I apply behavioral science to cut cognitive load and prevent errors in complex decisions.

EXPERIENCE

Lead Product Designer · Rightpoint · New York, NY — Feb 2022 – Present

- **Agentic AI marketing platform (Fortune 500 retailer, 2026):** Designed and shipped campaign activation and editing, where an AI agent edits live ads, budgets and creative alongside marketers. Built the create, edit and clone flows and reusable product sets and audiences, adapting to each ad platform's rules, plus the confirmations, error states, and visual QA that keep humans in control of AI actions.
- **VIU by HUB (digital insurance, 2022–2024):** Contributed to 25% revenue growth after launch by leading the design transformation across web, iOS and Android, including the platform's first design system: 100+ components with documentation and governance, cutting feature build time from weeks to days. Redesigned plan comparison, coverage review and enrollment flows, validated through 20+ usability tests.
- **Service design standard:** Replaced competing blueprint templates with one modular system, eliminating 93% of redundant templates. Adopted by 50+ people across 8 departments, with a 3x increase in blueprints created and shared.
- **Omnichannel strategy (utility client, 2025):** Interviewed 18 customer service reps and built 4 journey maps and a unified service blueprint so customer context carries from self-service to live agents.

Senior Product Designer (Contract) · North Agency · Remote — Apr 2022 – Mar 2023

- Established accessibility standards and navigation systems for client products, improving engagement and trust.

Product Designer & UX Researcher (Contract) · Second Opinion · Remote — Nov 2021 – Dec 2021

- Researched and prototyped a caregiver app that brings vitals, medications, appointments and care notes into one place. In testing with 18+ caregivers, 92% felt more confident managing medications and 90% valued having all care information in one place.
- Designed transparent privacy explanations and data states so caregivers could confidently track and share sensitive health information.
- Broke multi-step caregiving tasks into guided flows with progress cues to reduce cognitive load and errors.

SKILLS

Product design: end-to-end UX, interaction architecture, conditional and multi-state flows, multi-role and permission-based interfaces, design systems and tokens

Human–AI interaction: agent oversight patterns, confirmations and error recovery, AI-assisted research synthesis

Research & accessibility: qualitative and quantitative research, usability testing, WCAG 2.1 / ADA, compliance documentation, journey mapping, service blueprints

Tools: Figma, Framer, Cursor, GitHub Copilot, GitHub, Optimal Workshop

EDUCATION

Bachelor's Degree, Cell and Molecular Biology · Occidental College · Los Angeles, CA
